Natural Pools & Ponds

**AQUALIVIN**  
creates a natural  
environment,  
which is in perfect  
harmony with the  
landscape and totally  
integrated in the  
garden.

Aqualivin is exclusively using the patented SORGIVA system from Italy to allow our company to build free form natural swimming pools that fit perfectly in gardens and relaxation areas; thus creating a perfect atmosphere for nature lovers.

Our bio swimming pools are characterized by natural materials such as quartz and pebble stones, thus giving the feeling of being on the bank of a river, lake, or a Caribbean beach.

We customize your natural swimming pool in order to suit your aesthetic tastes, and to create a real bathing and relaxing area with gravel and water plants

# The excellence of natural swimming pools...

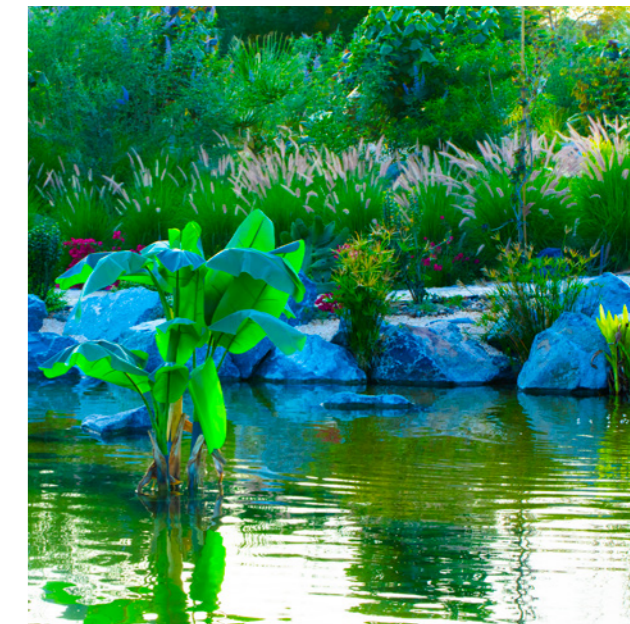

Aqualivin is specialized in the design and build of :

## Natural Beach Pools

The main advantage of a beach entry pool is the accessibility and non-slip surface. Children, elderly and people with disabilities find it easier to enter this kind of swimming pool. No more ladder or stairs! Apart from this, the slope itself is a perfect spot to lay down and sunbathe.

## Natural Ponds and Water features :

We build natural ponds and waterfalls that resemble nature. Our water features utilize water filtration techniques that mimic nature and require very little maintenance. Our work focuses on providing customers a natural, environmentally friendly approach to crafting and sustaining water features. AQUALIVIN is a certified contractor from AQUASCAPE that has been creating and field-testing beautiful water features since 1991 in order to provide you with the most reliable products and best value in the industry.

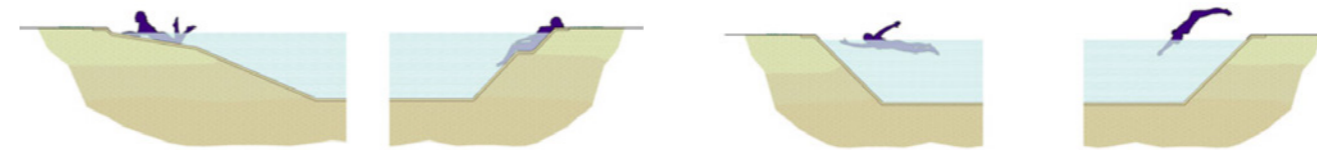

# Natural Beach Pools

Speaking of inground pools, they immediately recall to mind the traditional “boxes” in concrete. They are suitable for swimming, but unattractive from an aesthetically point of view and difficult to integrate in the surrounding environment. At least, this was the situation until recently.

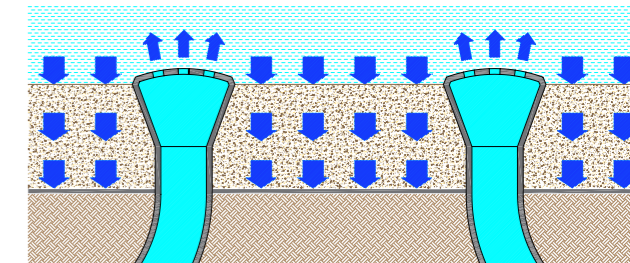

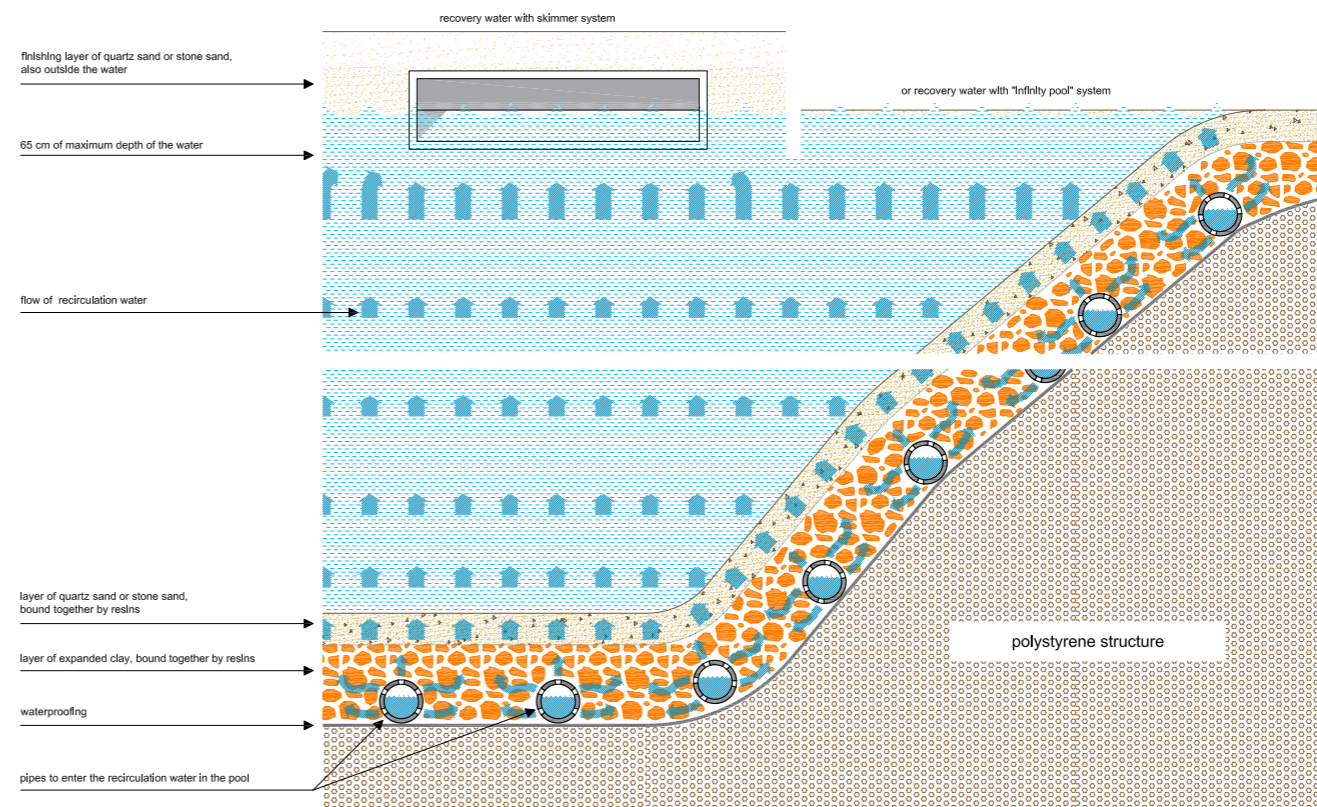

The name SORGIVA (spring in English) emphasizes the main feature of this patent through which the filtered water is fed under the finishing layer of the pool in order to flow out diffusely through the entire surface. Our pools integrate perfectly with the new salts sterilization systems containing sodium, magnesium, oxygen...etc allowing you to enjoy a completely natural swimming pool with no chlorine or irritated skin and hair.

Ideal for relaxation and sunbathing immersed in water.,Excellent for hosting whirlpool to accommodate whirlpool and aerotherapy. Safe because it creates a small terrace at 35-30cm deep, through which the entry into the pool is gradual.

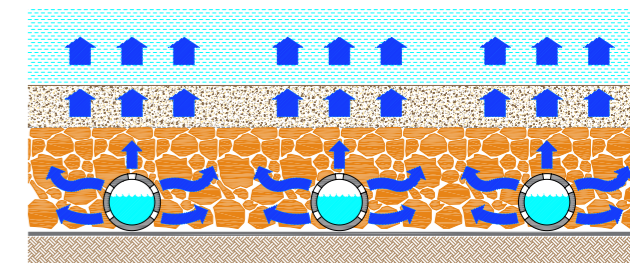

Thanks to the free form and the sloping walls of the SORGIVA pools, you will have more space to swim and dive, all in total safety. Compared to a traditional swimming pool, thanks to its particular structure, is unparalleled!

## Type section of the hot tub made with SORGIVA system

### Traditional system:

- visible inlet fittings;
- no equal distribution of water all over the pool; stagnation of water on the coating;
- growth of algae and bacteria;
- difficult maintenance.

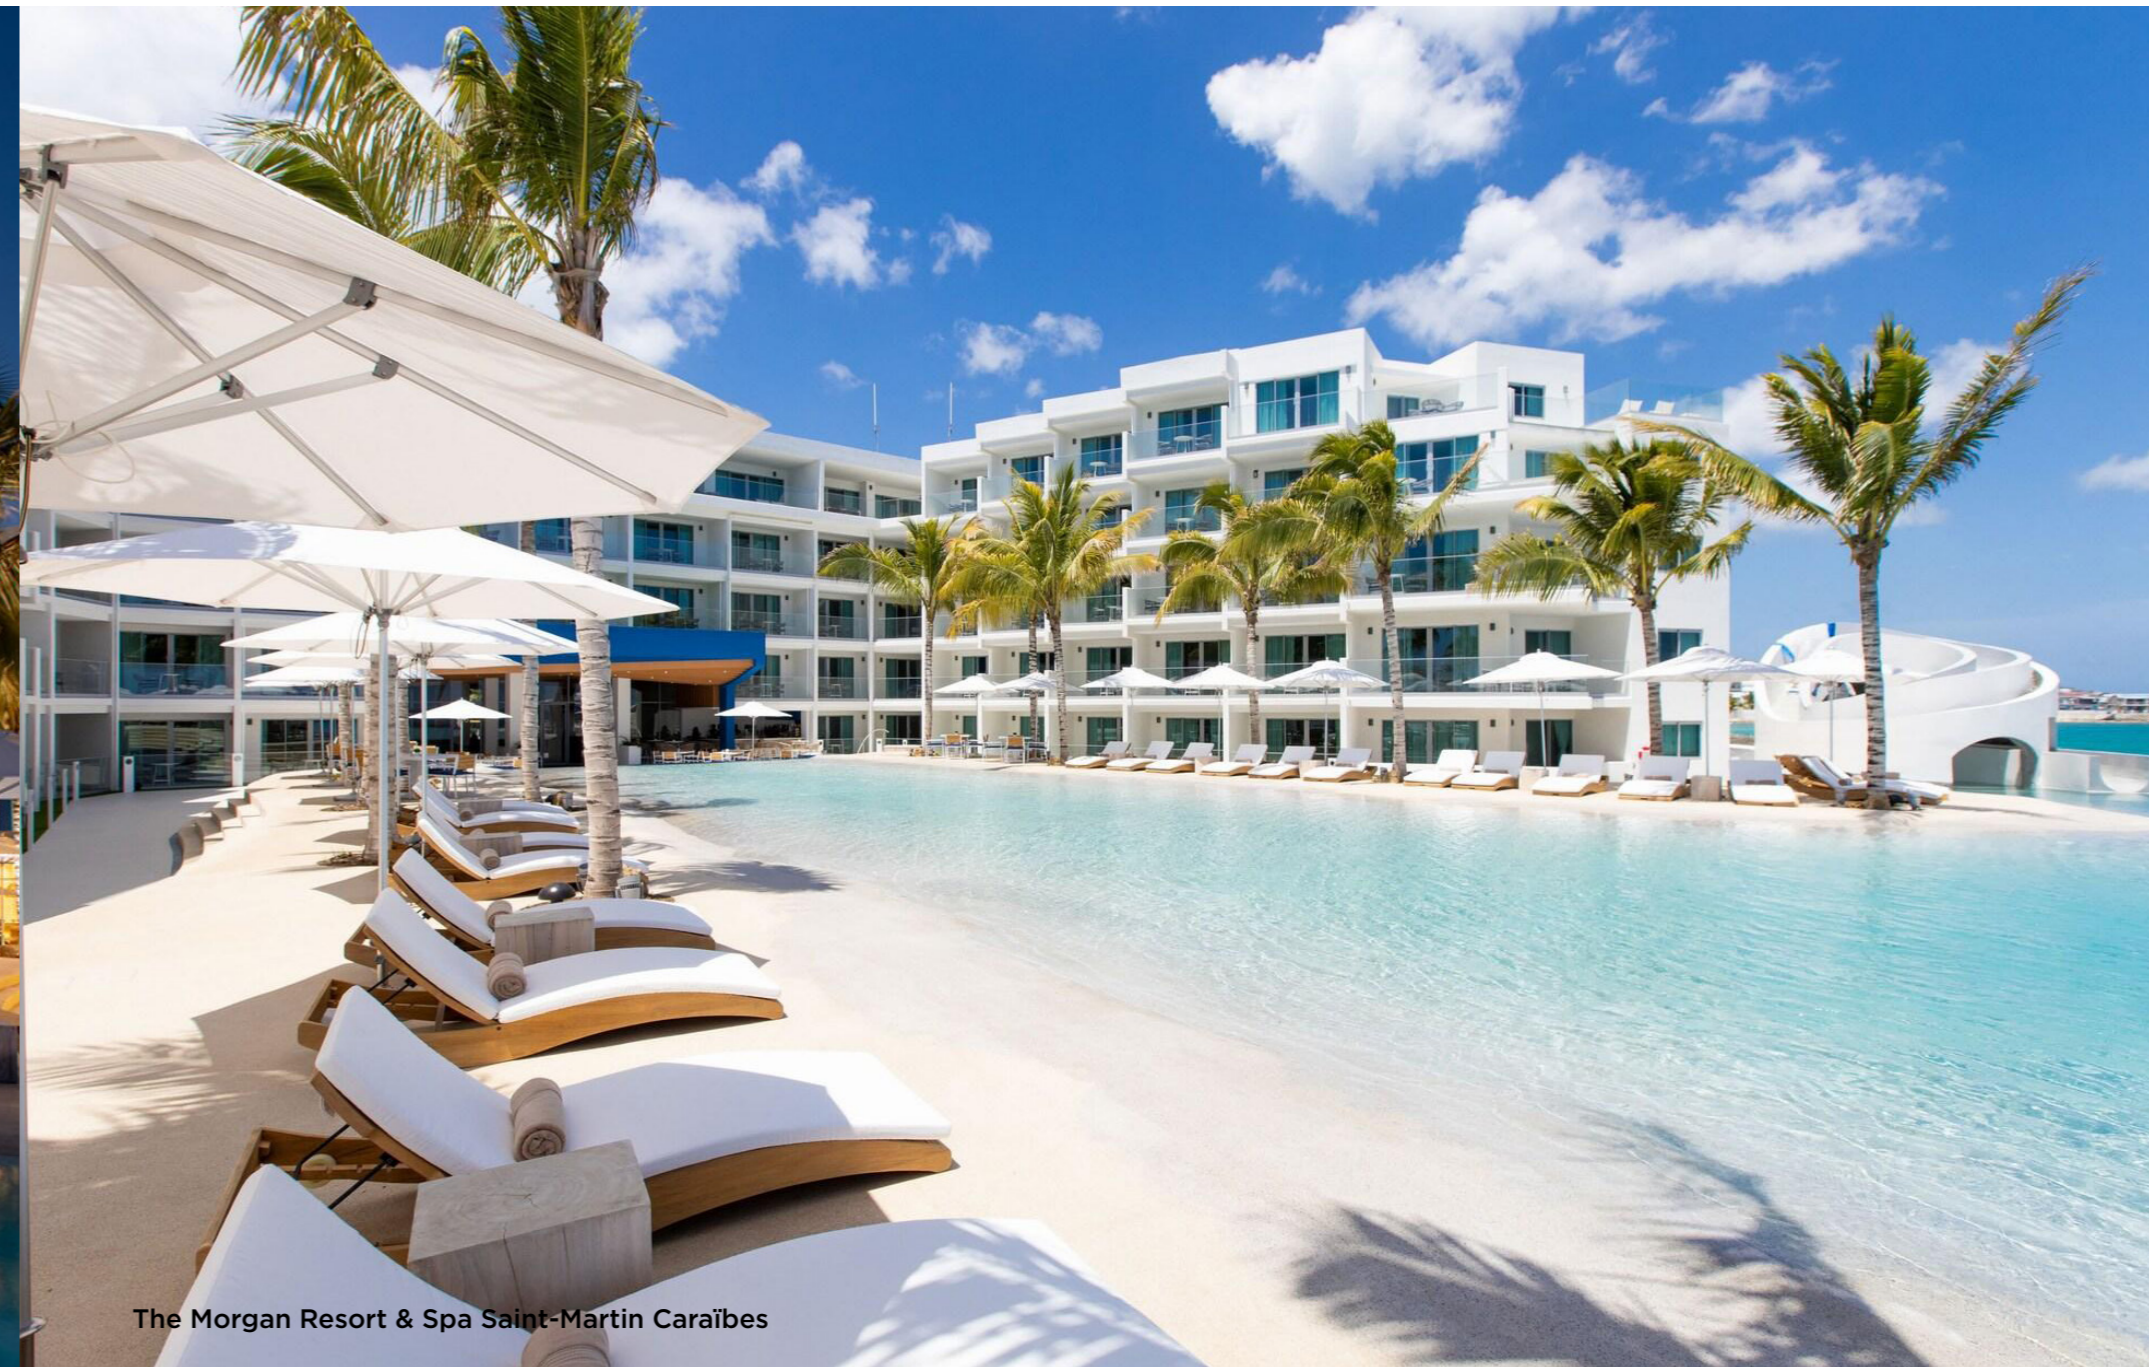

### Sorgiva system:

- no visible inlet fittings;
- equal distribution of water all over the pool, including beaches
- optimal disinfection of the swimming pool;
- natural appearance of the entire reservoir;
- comfortable and optimal maintenance of the pool.

The Morgan Resort & Spa Saint-Martin Caraïbes

The Morgan Resort & Spa Saint-Martin Caraïbes

There are many characteristics that make a AQUALIVIN Pool innovative, starting from not being invasive from the environment. This gives the opportunity to create a pool without any concrete that interacts harmoniously with the location. This means that the environment is the first beneficiary: the used products, the waterproofing liner and the weights of the structure are a real innovation, a way to create luxury and ambience at the same time.

## Natural Ponds & Water Features

Transform your yard into a breathtaking retreat from the world with an AQUALIVIN pond, waterfall, fountain, or other decorative water feature. Imagine stepping outside your home into your very own oasis. Sit back and listen to the soothing sounds of running water as you enjoy the enchanting sights of nature. Feel the cares of today's busy world slip from your shoulders as you relax and de-stress in your very own personal paradise!

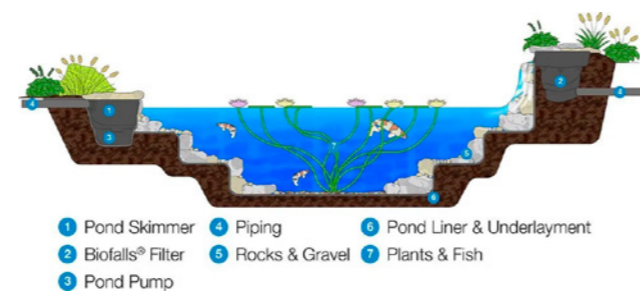

**Recreational Swimming Pond with Waterfall, Private Farm, Jordan**  
 Size: 20 x 7 x 1.5 meters pond, 2 meter waterfall  
 Volume: 22,000 gallons

Our work focuses on providing customers a natural, environmentally friendly approach to crafting and sustaining water features. AQUQLIVIN is a certified contractor from AQUASCAPE that has been creating and field-testing beautiful water features since 1991 in order to provide you with the most reliable products and best value in the industry.

Ecosystem ponds work with Mother Nature to provide food, shelter, and safety to the wildlife around it. It also provides an all-natural, low-maintenance piece of paradise. Every piece of the ecosystem puzzle must be present in order for a true ecosystem to be in place. Eliminate one of these elements and you've got an unbalanced ecosystem.

Check out the things you'll need to get your ecosystem pond in perfect balance:
